The Project is a proposed co-located utility-scale energy generation, storage and data center consisting of alternating current (AC) solar energy generation, natural gas generation, battery energy storage system (BESS), hyperscale data center, and ancillary facilities. The Project will be located on approximately 6,339 acres of private land in Platte and Goshen counties.

The company requested this pre-application meeting to present the project to WDEQ and to provide their preliminary regulatory assessment and project timelines. The company requests any preliminary permitting or modeling guidance from WDEQ as well as current permit process review timeline and any suggestions to potentially expedite the permitting process.

Air: The company's preliminary emissions estimates indicate that the Project will trigger PSD review for most PSD pollutants.

Water: The project assumes a closed loop cooling system that will not exceed 800 acre-feet of state waters annually.

ISD:

When

Wednesday Mar 11, 2026 · 8:30am – 10:30am (Mountain Time - Denver)

Guests

Nancy Vehr - organizer

Jennifer Zygmunt

Andrew Keyfauver
